EDUCATION

T-king-al-ahla-viddiyalayam, Nad Ootru-kinniya-05

I studied all of my grades in al-ahla i only completed o/l .

PROJECTS

A social media clone - built using MERN Stack, focusing on responsive design and user experience

I use MERN and also inspired this project because of 'as a programmer' you tube channel, this is my first project i faced lot struggle on this time i have thought i can't but i believe on me and then finally i did

Book shop E-commerce build using (MERN)

I inspired this project with a YouTube tutorial I saw, his channel name 'as a programmer' and I got some ideas to create this and I learned a lot on one project. It takes so much of my time ,I spend 4 hours in a day but I love that process .

ADDITIONAL SKILLS

Focused on maintenance and ongoing support for deployed applications. My approachability and efficiency in designing user-friendly interfaces enhance the online presence of brands. Adept in state management for improving user interactions and experiences in applications. Additionally, skilled in website development and familiar with using Xampp for local development environments. I have a strong passion for achieving results that benefit business objectives and enhancing user engagement through payment gateways for seamless transactions.
